"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundredfold, in some cases almost incalculably; unreasonably; and speculation has been rife...

(from The American Journal of Numismatics, Vol. 1, No. 1, May 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.
2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.
3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or no reason. My business depends on attracting repeat customers. It does neither of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.
4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request.
5. All orders are sent postpaid.
6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin.

I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described : "1805 S-267 VF20 Sharpness of VF30 with smooth brown surfaces, some light pinscratches where corrosion was removed at K1 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed It is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC rarity ratings as compiled by Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings die state and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only. Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large Cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgments and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

-. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discriminating collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose. Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson, (who's collection did very well for him when it was sold in 1989), likes to say. THINK ABOUT IT! When you ask a cat which canary to buy remember his first concern may not be how well it sings! There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a much better chance of success.

Welcome to fixed price list #40! It is getting to sound like a long string of catalogs. Many of you I've done business with since list #1 and before! A few of you I'm now helping to put together set #2 or #3. It's been a lot of fun. There are many new items on this list. First let me apologize for the length of time it took to get this out. I hope it will have been worth the wait. I'm especially proud of the long run of 1794 Cents. Certainly the nicest group I have ever had to offer. In addition I recently purchased a nice collection of Half Cents most of which are offered here for the first time. I hope you will find something that will fit in your collection. Bob Grellman and I just held our eighth all early copper sale in Long Beach, California on June 5th. Our next sale is scheduled for July 31st in Baltimore MD. and will feature the Cliff Kolbus collection of late date cents. This will be the most extensive offering of late dates by variety ever sold at auction. You should receive a catalog of this sale the first week in July. If you are thinking of selling all or part of your collection this can be a great way to go. We are looking for a major consignment to our fall sale. Contact me if you are interested.

I will be attending the American Numismatic Association convention in Baltimore MD July 27 - Aug. 1 table # 645. Stop by and see me.

Lillian Scheer

The name of Lillian Scheer occasionally appears in the pedigree of Cents from some of the older collections. Though she was not a collector in any real sense Ms Scheer came to be the owner of some nice early copper. In another more important if less direct way she contributed to our hobby greatly. You see Lillian Scherr was the housekeeper for Henry Hines one of the great collectors of his time. Of his time or of any time! As Dr Sheldon was fond of saying when it came to choice pieces, "Hines had'er!". Unfortunately in the last years of his life Mr. Hines wife took ill and much of his fortune was devoted to her care. In the end he had little other than his precious cent collection. This was slowly dispersed to pay for his wife's care and for his own expenses. During this time the day to day responsibilities of running his household fell to Ms Scheer.

Though without normal resources Mr. Hines took care prior to his own death to make provisions for Ms Scheer's upkeep. He left to her a substantial number of coins which were sold in one group to Willard Blaisdell. As Lillian Scheer knew next to

nothing about coins it may be guessed that Blaisdell had little trouble paying her well in excess of their true value without any risk of injury to her pride. The next time you hold in your hand a piece of old copper with the pedigree Hines-Scheer-Blaisdell, know that you are preceded in its possession by three remarkable people.

A VERY SHORT STORY THAT CLAIMS TO HAVE

VERY LITTLE TO DO WITH ANYTHING WHATSOEVER

An old woman stood outside a large building filled with business offices selling apples for twenty-five cents each. Each morning as regular as clockwork she could be counted on to be on her corner outside the building selling her apples. Just as regularly each morning a business executive who worked in the building would pass by and place a quarter in her hand. But he never took an apple.

One morning as the businessman passed by he placed a quarter in her hand just as usual but she grabbed a hold of his arm and would not let him go on. Surprised he turned to her and said; "I guess you grabbed my arm because you want to know why I've been putting a quarter in your hand every day for these past many years even though I never take an apple?" " No", the woman replied; "it's just that the price of apples is now thirty five cents..."
